

## THEME of the MONTH

## Hair

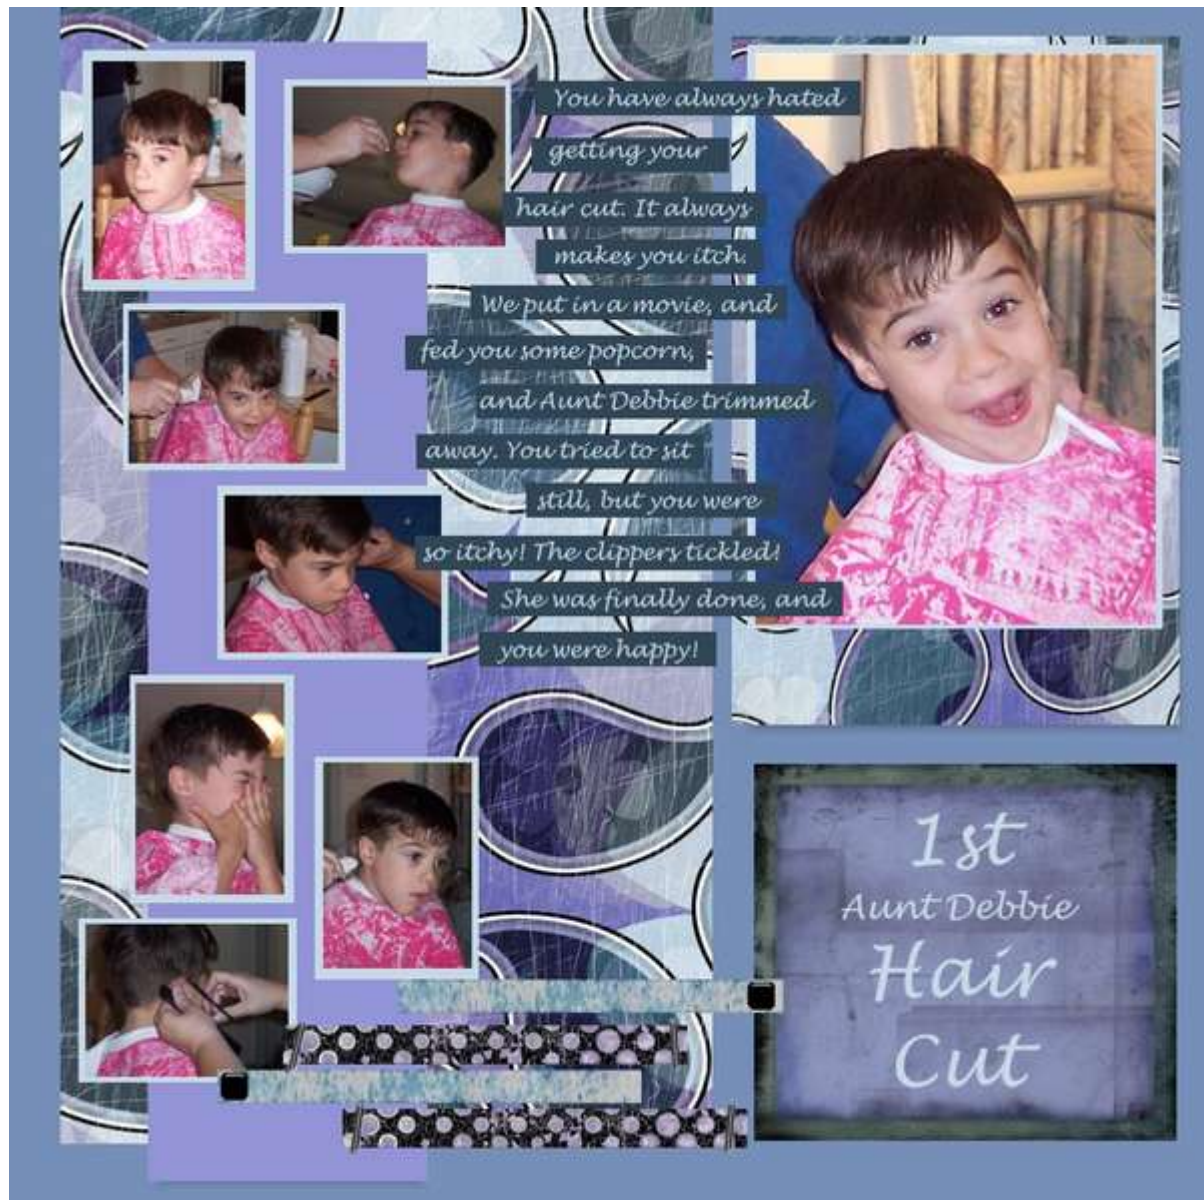

Theme – Hair

### Description

Last year, we had amazing set of themes per month. Now, it gets more interesting as we start our first month of 2017 with hair as our theme for January. We can do a lot of things with our hair. Whether you have short or long hair, you can do different styles with it. Here are some layouts that may inspire you with your next scrapbook project.

### First hair cut

Do you have photos of your child's first haircut or the time he/she played with her hair or tried new style (when they decide to trim their bangs, just to see what it will look like)? A large majority of children will have tried this at one point or another, and you might have that story to tell. But otherwise, it could be all about the first trip to the barber, or maybe the time you cut their hair at home.

## Bad hair day

Hair can have a mind of their own. Some people have easy to manage hair, while others often struggle with them. A bad hair day can be common or unusual. Which one is your case?

## Beautiful hair

Some people are blessed with not only easy hair to manage, but beautiful hair. Sometimes, people will have beautiful natural hair color, others will have super shiny hair, some will have very long hair, others will have magnificent natural curls.

Well there's room enough to share up in  
Sophia's hair... It doesn't matter who you  
know or what you do. Everyone has the  
right to be tangled up and blue...  
Venture if you dare up to Sophia's hair...  
Though its mangled and a  
mess I like like to  
think it's

# Blessed

—Henrietta's Hair by Justin Roberts

You are indeed blessed with a full head of long, curly, blonde hair. That makes a lot of work for your mom and dad. Especially because you hate having your hair brushed. Even the slightest tug makes you scream and protest. A few times I gave up and took you out looking like you came out of the woods and were raised by wolves. It's a shame because you look so pretty with your hair tied up. The new rule is that your hair must at least be brushed before we leave, no matter how unpleasant the experience is. We try smearing the \$4-oz conditioner in your head to make the brush go through a little easier, but you still put up a fight. I try to tell you that hair brushing is just one of the inconveniences of being a girl and you just have to accept it. And when it's brushed and tied back, I can admire it and be thankful that you're blessed with such nice hair.

## Crazy hair

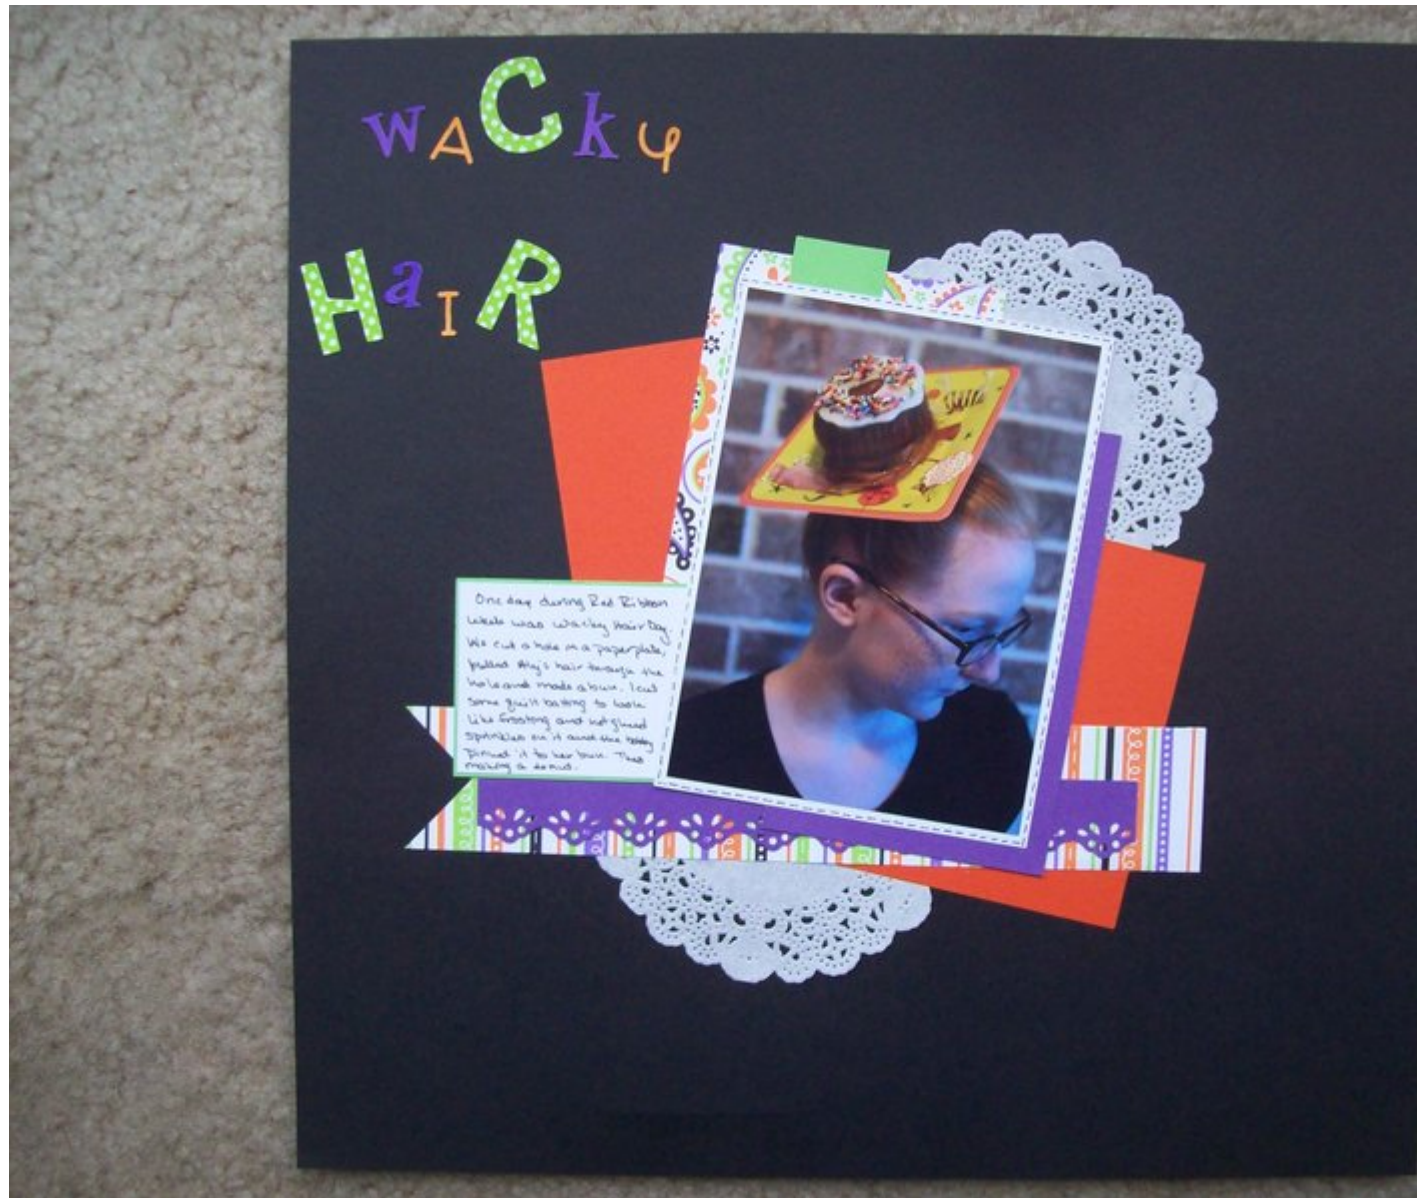

Did you or your child tried a different hair color or hair style? You can use it with your layout too! It could be for a Halloween costume, for a school theme hair day, or just for the fun of it. Why not?

## Doing hair

This is a fact of life. Unless you are bald, you will have to do SOMETHING to your hair in the morning (if you don't want just a natural "bad hair day"). Do you curl them? Do you straighten them? Do you style them?

Layout from Doreena

And furthermore, it could become a special time to spend with your child while doing their hair (as long as they are not too tangled!).

**New hair style**

How about an opportunity to showcase that new hair style you've tried for the very first time!

Time for a selfie!

## Special occasion

Sometimes, a special hairdo is in order, for a special occasion. Wedding and graduation will often be those occasions for a unique hairdo.

Layout from Laurengirl

Showcase your hair stories too! Which one will it be? A beautiful hair day? A bad hair day? A crazy hair day? Don't forget to share it with us through in the forum or on our Facebook page.

We can't wait to see your work!

## **BONUS:**

In order to add a little unique touch to your next "hair" project, you can get these three picture tubes that will let you create long braids, in any shape you want. Whether you want to create a "hairy" frame, add hair to your relatives for a funny picture, or you want an extra long braid from Rapuntzel, you can do it with these picture tubes.

Simply [click HERE](http://scrapbookcampus.com) to get your picture tubes.
