Beach Comber

Don't you just love to follow the coastline looking at the wonderful creatures that live in these parts? You can see different shells, small crabs and other crustaceans, even seaweeds. Fishes can also get stranded in tide pools. You can also find beautiful sea stars and sea birds on the beach.

However, it's important to never take anything. You can look (and maybe touch), but please don't take anything. For sure, you can take as much photos as you want!

Kite Flying

The beach is also a great place to fly kites. Since sea breeze is a constant force, those kites are going to fly high for sure!

Footprints in the Sand

Just walking down the beach, sinking your feet in the sand, and feeling the rise and fall of the waves on your ankles while staring into the horizon and breathing in the salty air - it's oddly therapeutic.
