

Scrapbooking Theme – Mail/Letters

Description

Before the advancement in technology, we used to get overly excited whenever we receive letters via postal mail. Those days are long gone but anyone who had experienced that thing can probably agree that it was something special and very unique. Imagine having to read beautifully handwritten messages from the people you love and care about. Isn't it wonderful to know somebody remembered you and took the time to write and send you a letter?

Unlike emails and text messages which you can receive in an instant, snail mails take some time to get to you. Typically, it can take 1 to 4 days or even a whole week depending on the location and circumstances. Yes, you might have to wait for days but that's part of the thrill!

Do you like writing letters? Do you still have a collection of handwritten mails from your family, friends, or someone special? Then, take a look at these layouts we featured here so you can get some ideas on how to put them in the spotlight for your next scrapbooking project.

Letters from Home

There are times when we are far away from home and couldn't easily communicate with our family, friends, or relatives. We wonder how they are and what they've been doing. So to keep in touch with them, people back in the old days usually send letters to each other and sometimes included pictures along with them.
