Scrapbooking Theme – Computers

Description

In recent years, we have made astounding technological advances and the most notable of these advances are ones made to computers. Computers are almost indispensable for many people all over the world. It is widely used in business, the academe, in hospitals, scientific research, and you know what else? Our scrapbook layouts!

Computers are like electronic magical devices that make our lives easier and accessible. Isn't that fascinating? Families and friends all over the world can contact each other in seconds and businesses are thriving using this technological marvel. What fun!

You may actually be on your PC reading this blog post right now! You may also have a tale to tell just like all of these fellow designers who took inspiration from computers.
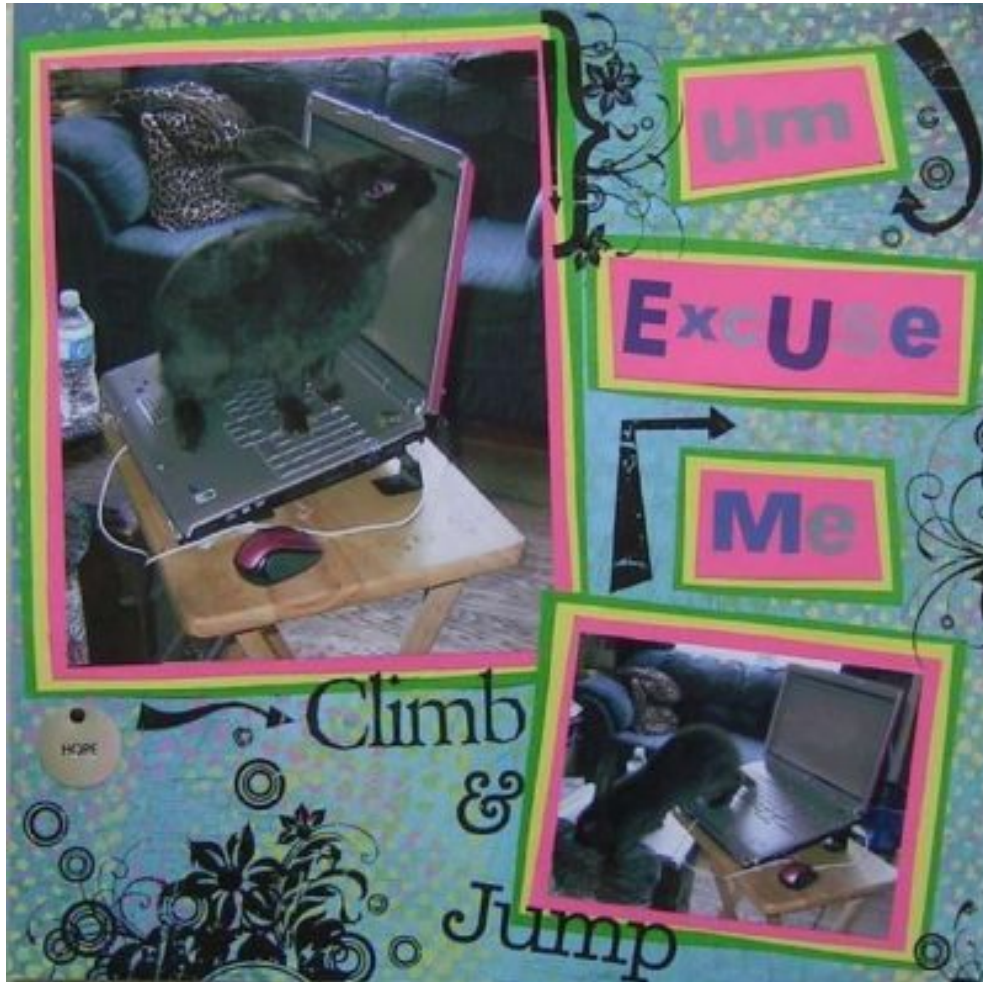

Tails of Computers

What is it about computers that our pets seem so attracted to? Is it the shape, color, or its warmth? Just like humans, these animals enjoy the warmth of a computer along with the soft glow of the screen. Our pets are very curious, after all. What is so fascinating about these glowing rectangle screens that their humans stare at for many hours? Let's find out.

Do you have some photos you want to display or a computer story to tell? You can have a fun title if

you were to use these LED letters. **Click HERE** to request this complete uppercase alphabet in greyscale.

Once you have your hands on that alphabet, keep an eye on your inbox as you will also learn how to adjust it and even how to create more characters if they are not included in this set.
