Description

Honeymoon originates from old English and is a combination of two words, “Honey” and “Moone.” Honey represents sweetness like the food, and Moone refers to the period of one month. Couples used to celebrate the first month of marriage drinking Mead (a sweet drink) gifted to them. Honeymoon historically refers to the first month of marriage, which is expected to be the sweetest.

This represents one of the most traditional elements of the whole wedding and one that is highly unlikely to ever go out of fashion, even today. It is the period a couple spends time together alone, enjoying just the company of each other, away from family and friends. The first unforgettable moments as a married couple happen during this event of their lives. It is the time to bond, relax, enjoy things together, go on adventures, reflect on the relationship and what comes ahead. After all the stress of wedding planning, married couples deserve a memorable honeymoon. They usually go on a vacation or a trip to celebrate it.

How did you spend your honeymoon? Whether it could be on a beach, a trip to far away places, enjoying city lights or going on adventures, for sure it was a special one because you are with the one that you will spend your whole life with.
